

## Company

Created in May 2003, Photon Lines Ltd is a distribution company selling value added solutions into the UK and Ireland optics markets.

The focus of the company is two fold: We supply a range of cameras (including CCD cameras, CMOS cameras, streak cameras, intensified cameras) into low light level, high speed vision and imaging applications as well as high technology lasers and laser components into the fields of machine vision, life sciences, military, semiconductor and scientific research.

With sister offices in the UK, France and Spain, Photon Lines Ltd is able to call upon a pool of expertise in the field of photonics to the benefit of customers and suppliers alike.
