

## New 5000fps high speed CMOS camera

New 5000fps high speed CMOS camera

Mikrotron MotionBlitz Cube 5 high speed video camera

The Mikrotron Cube 5 high speed CMOS camera is capable of 5000fps at 512x512 resolution and up to and above 100,000fps in smaller regions of interest.

The Cube 5 high speed CMOS camera has onboard memory for recording sequences and a built in battery for stand alone operation. A GigE Vision data interface leads to high speed transfer of images. This camera is portable, compact and rugged.
