High Performance Microscopy Imaging Systems from Visitron

Life Sciences

High Performance Microscopy Imaging from Visitron Systems

Visitron Systems GmbH offers a range of microscopy solutions from single documentation of macroscopic and microscopic compounds up to multidimensional confocal high-speed microscopy. The modularity of the systems keeps them open to upgrades when new technology and new applications occur

Visitron offer systems for the following applications

- Live Cell Imaging
- Realtime Confocal Microscopy
- TIRF Microscopy
- Video Microscopy
- Calcium Ratio Imaging
- FRET /FRAP Microscopy
- GFP Imaging
- In-vivo mouse Imaging
- 3D Deconvolution Microscopy
- 6D Multi-well plate Imaging
- Histology RGB Imaging
